“Bucksport Bay Area Thriving in Place”

Bucksport Bay Healthy Communities has created a program, in partnership with you our community members, and many of your local and regional health care and service agencies, to better meet your health, safety, housing, transportation, and financial needs.

This partnership organization will work together with you to help you plan for your physical, emotional, and overall wellbeing as you age. The goal of the Bucksport Bay Area Thriving in Place program is to make sure that there are coordinated community resources in place to assist those who live with the daily challenges of chronic illness or disability. Thriving in Place means living comfortably and safely in your own home and community. This partnership program has been designed so that local and regional area agencies can work alongside you to help make that possible.

Please call 469-6682 for more information on how to join in!

“Thriving in Place” is funded by the Maine Health Access Foundation.

In partnership with the following organizations:

• Maine Long-Term Care Ombudsman’s Program
• Gardner Commons
• Bucksport Community Concerns
• Coastal Care Team
• RSU 25, The Senior Center, Parks & Rec. Dept.
WHAT IT CAN DO FOR YOU!

- Help you remain in the community of your choice as you age!
- You’ll have a team to help you plan your future
- Financial, legal, medical and housing resources at your fingertips
- Options to increase your independence
- Help in unexpected emergencies
- Peace of mind: a person to call for help
- Access to fun and fulfilling programs to stay healthy
- Transportation when needed
- A way to share your talent and experience with our community
